ADVANTAGES

SUPPLY CHAIN BY INTERMODAL SHIP, TRAIN AND LORRY

It makes sense to combine different modes of transport; especially the combination of ships, lorries and trains as an environmentally-friendly transport solution.

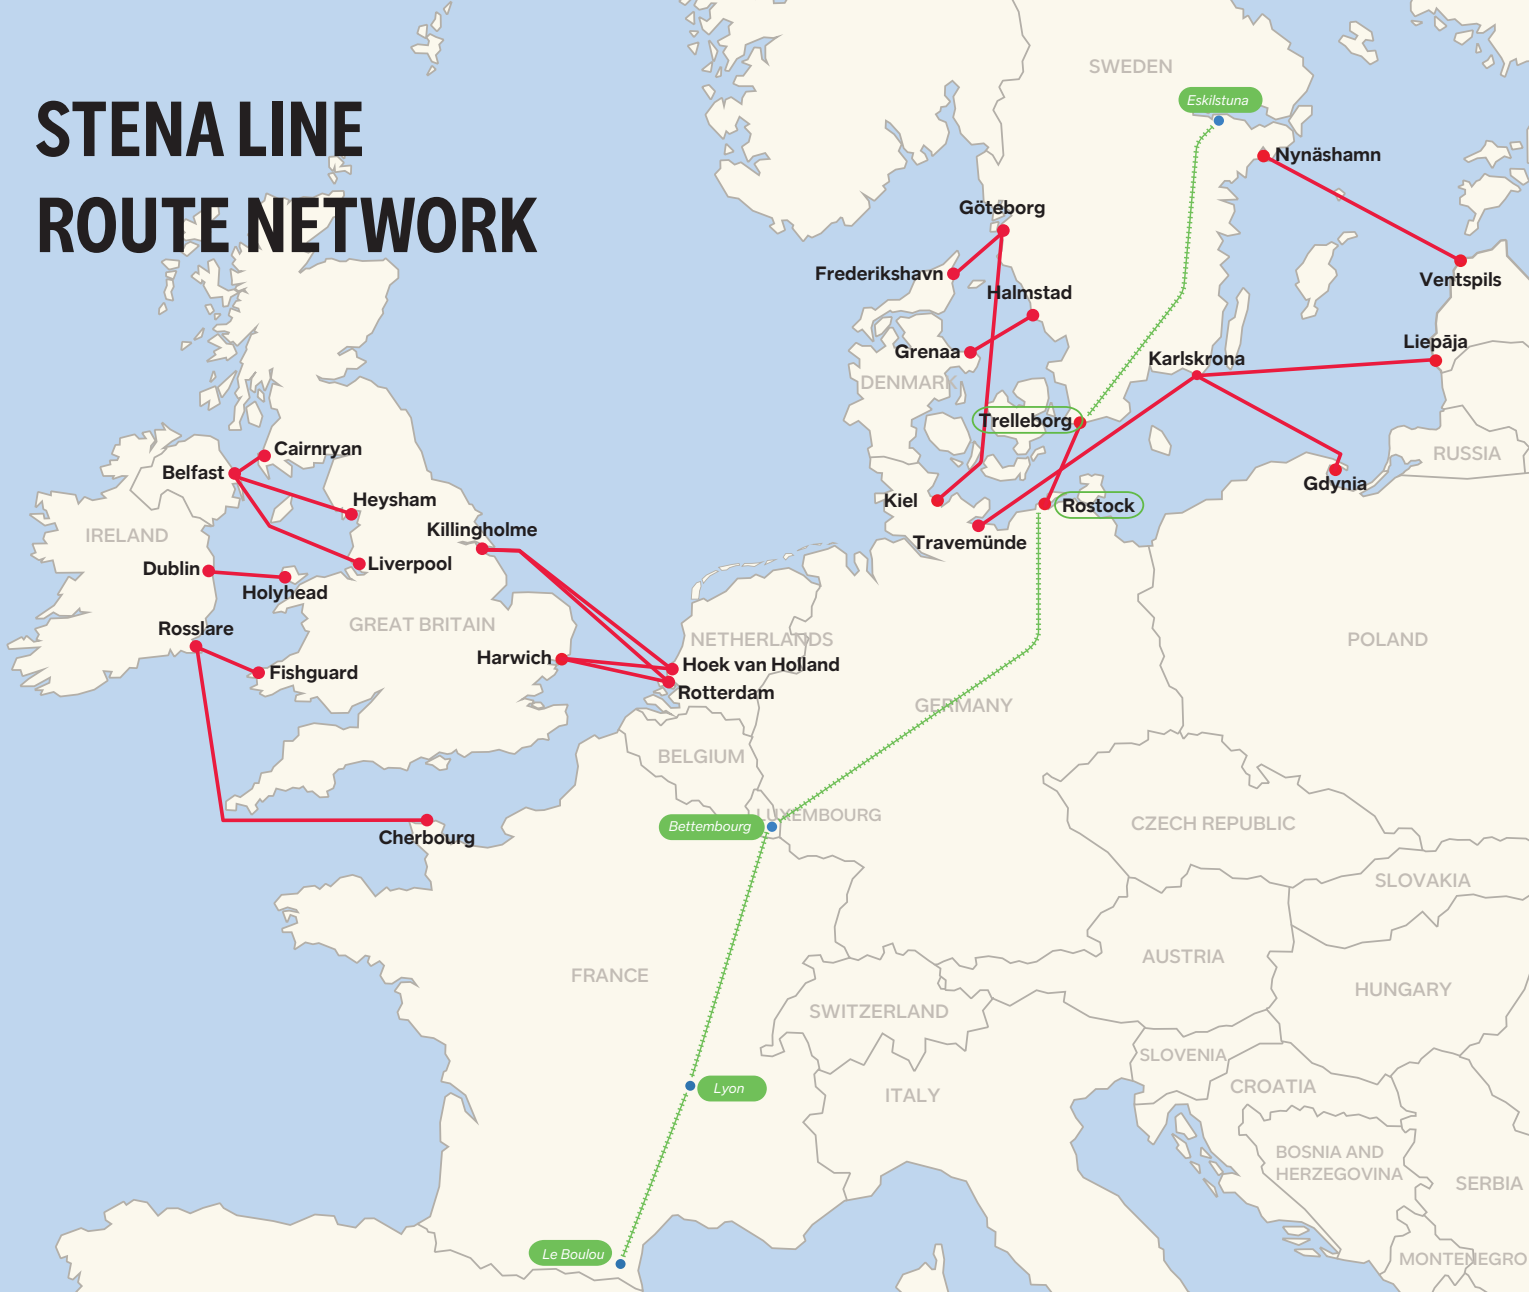

As it is also a cost-effective transport mode with huge capacity and flexibility the benefits become even more significant.

Our intermodal service which connects Sweden with Rostock to Bettembourg, with connection to France and Spain is just one of more intermodal services we offer our many customers.

“It brings value switching to environmentally friendly, smooth transition and reliable intermodal solutions”
